

# Toolkit on older people with an intellectual disability

## Knowledge transfer into society through an online toolkit

Authors: M.C.O. Kersten (mkersten@vgn.nl)\*, M. Hornman

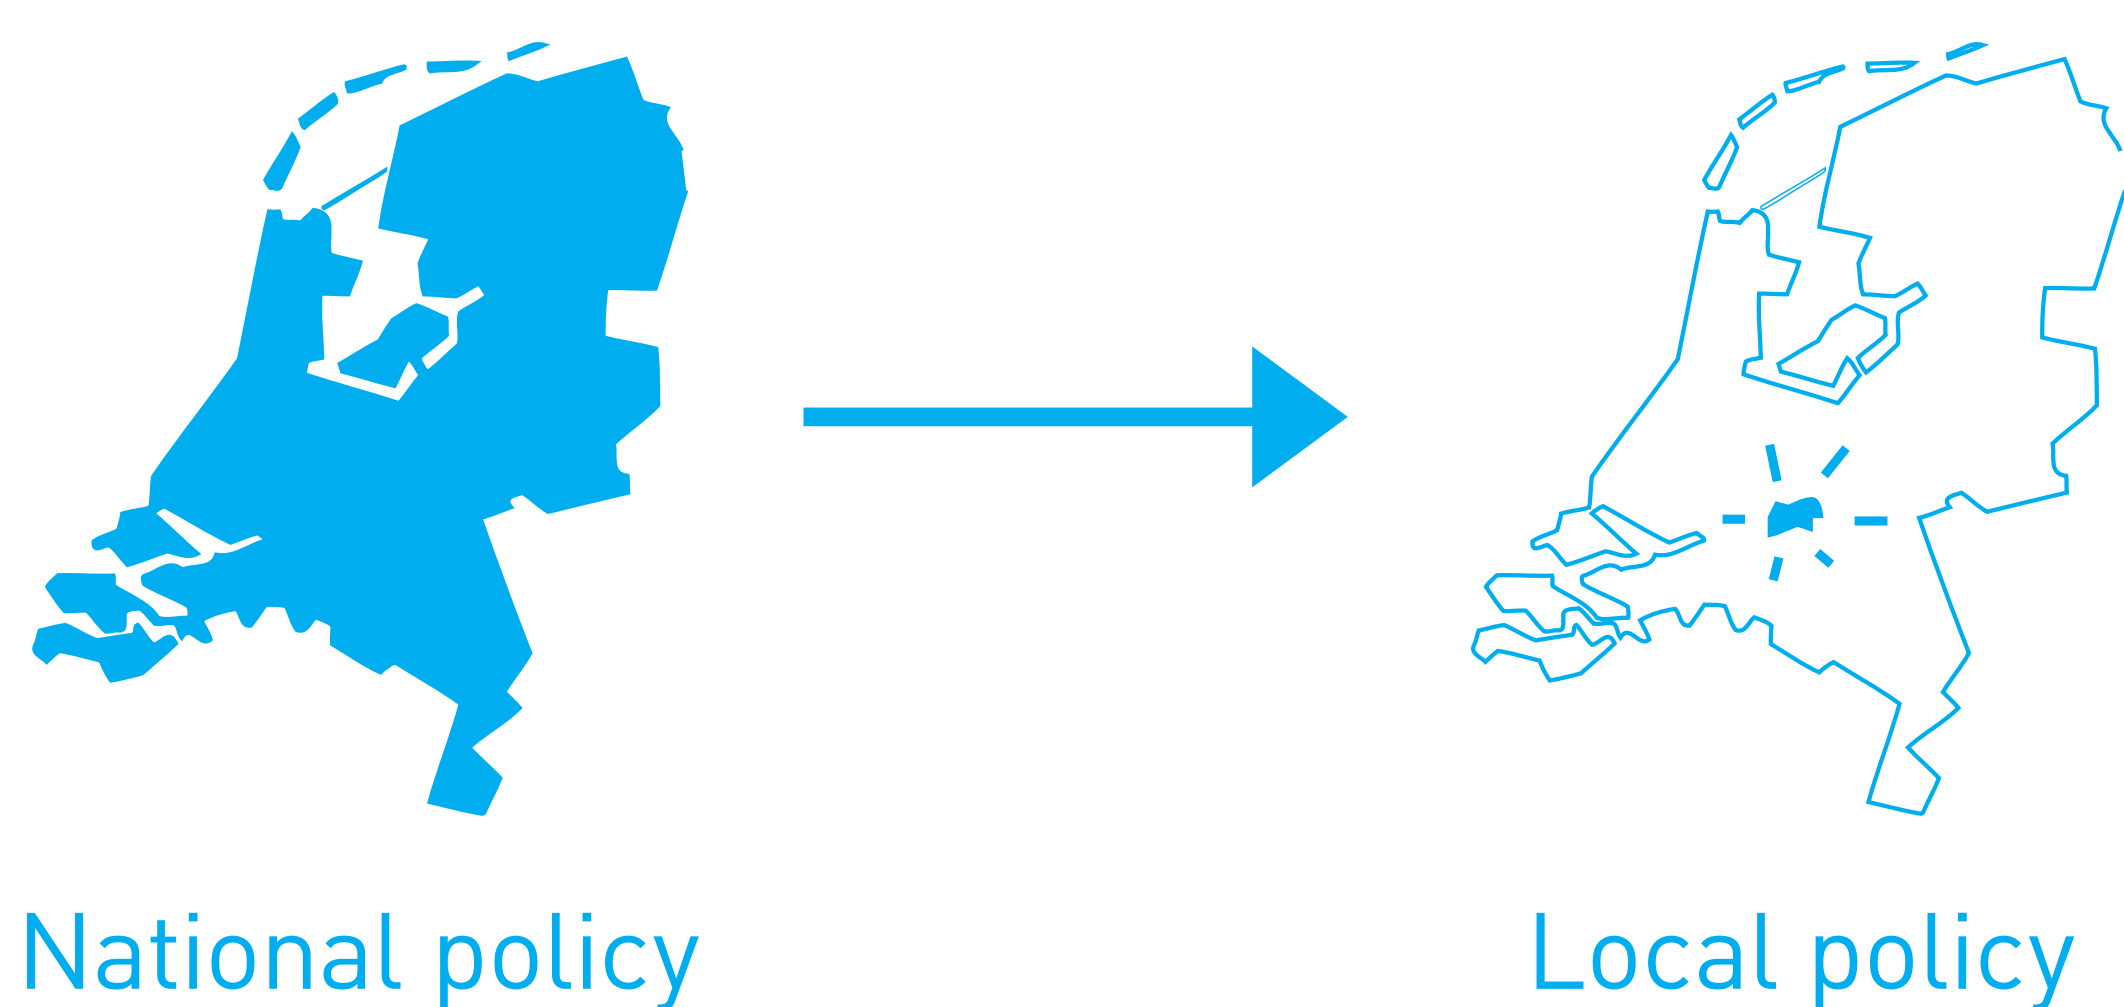

### Info

From the year 2015, due to imminent major transitions in Dutch health care, Dutch care and social welfare organisations and Dutch local councils will be increasingly confronted with older people with an intellectual disability. They have special features and special needs. Local councils don't have experience with them yet. This is why the VGN aims to equip them with up-to-date information about older people with an ID. Using Desk research and

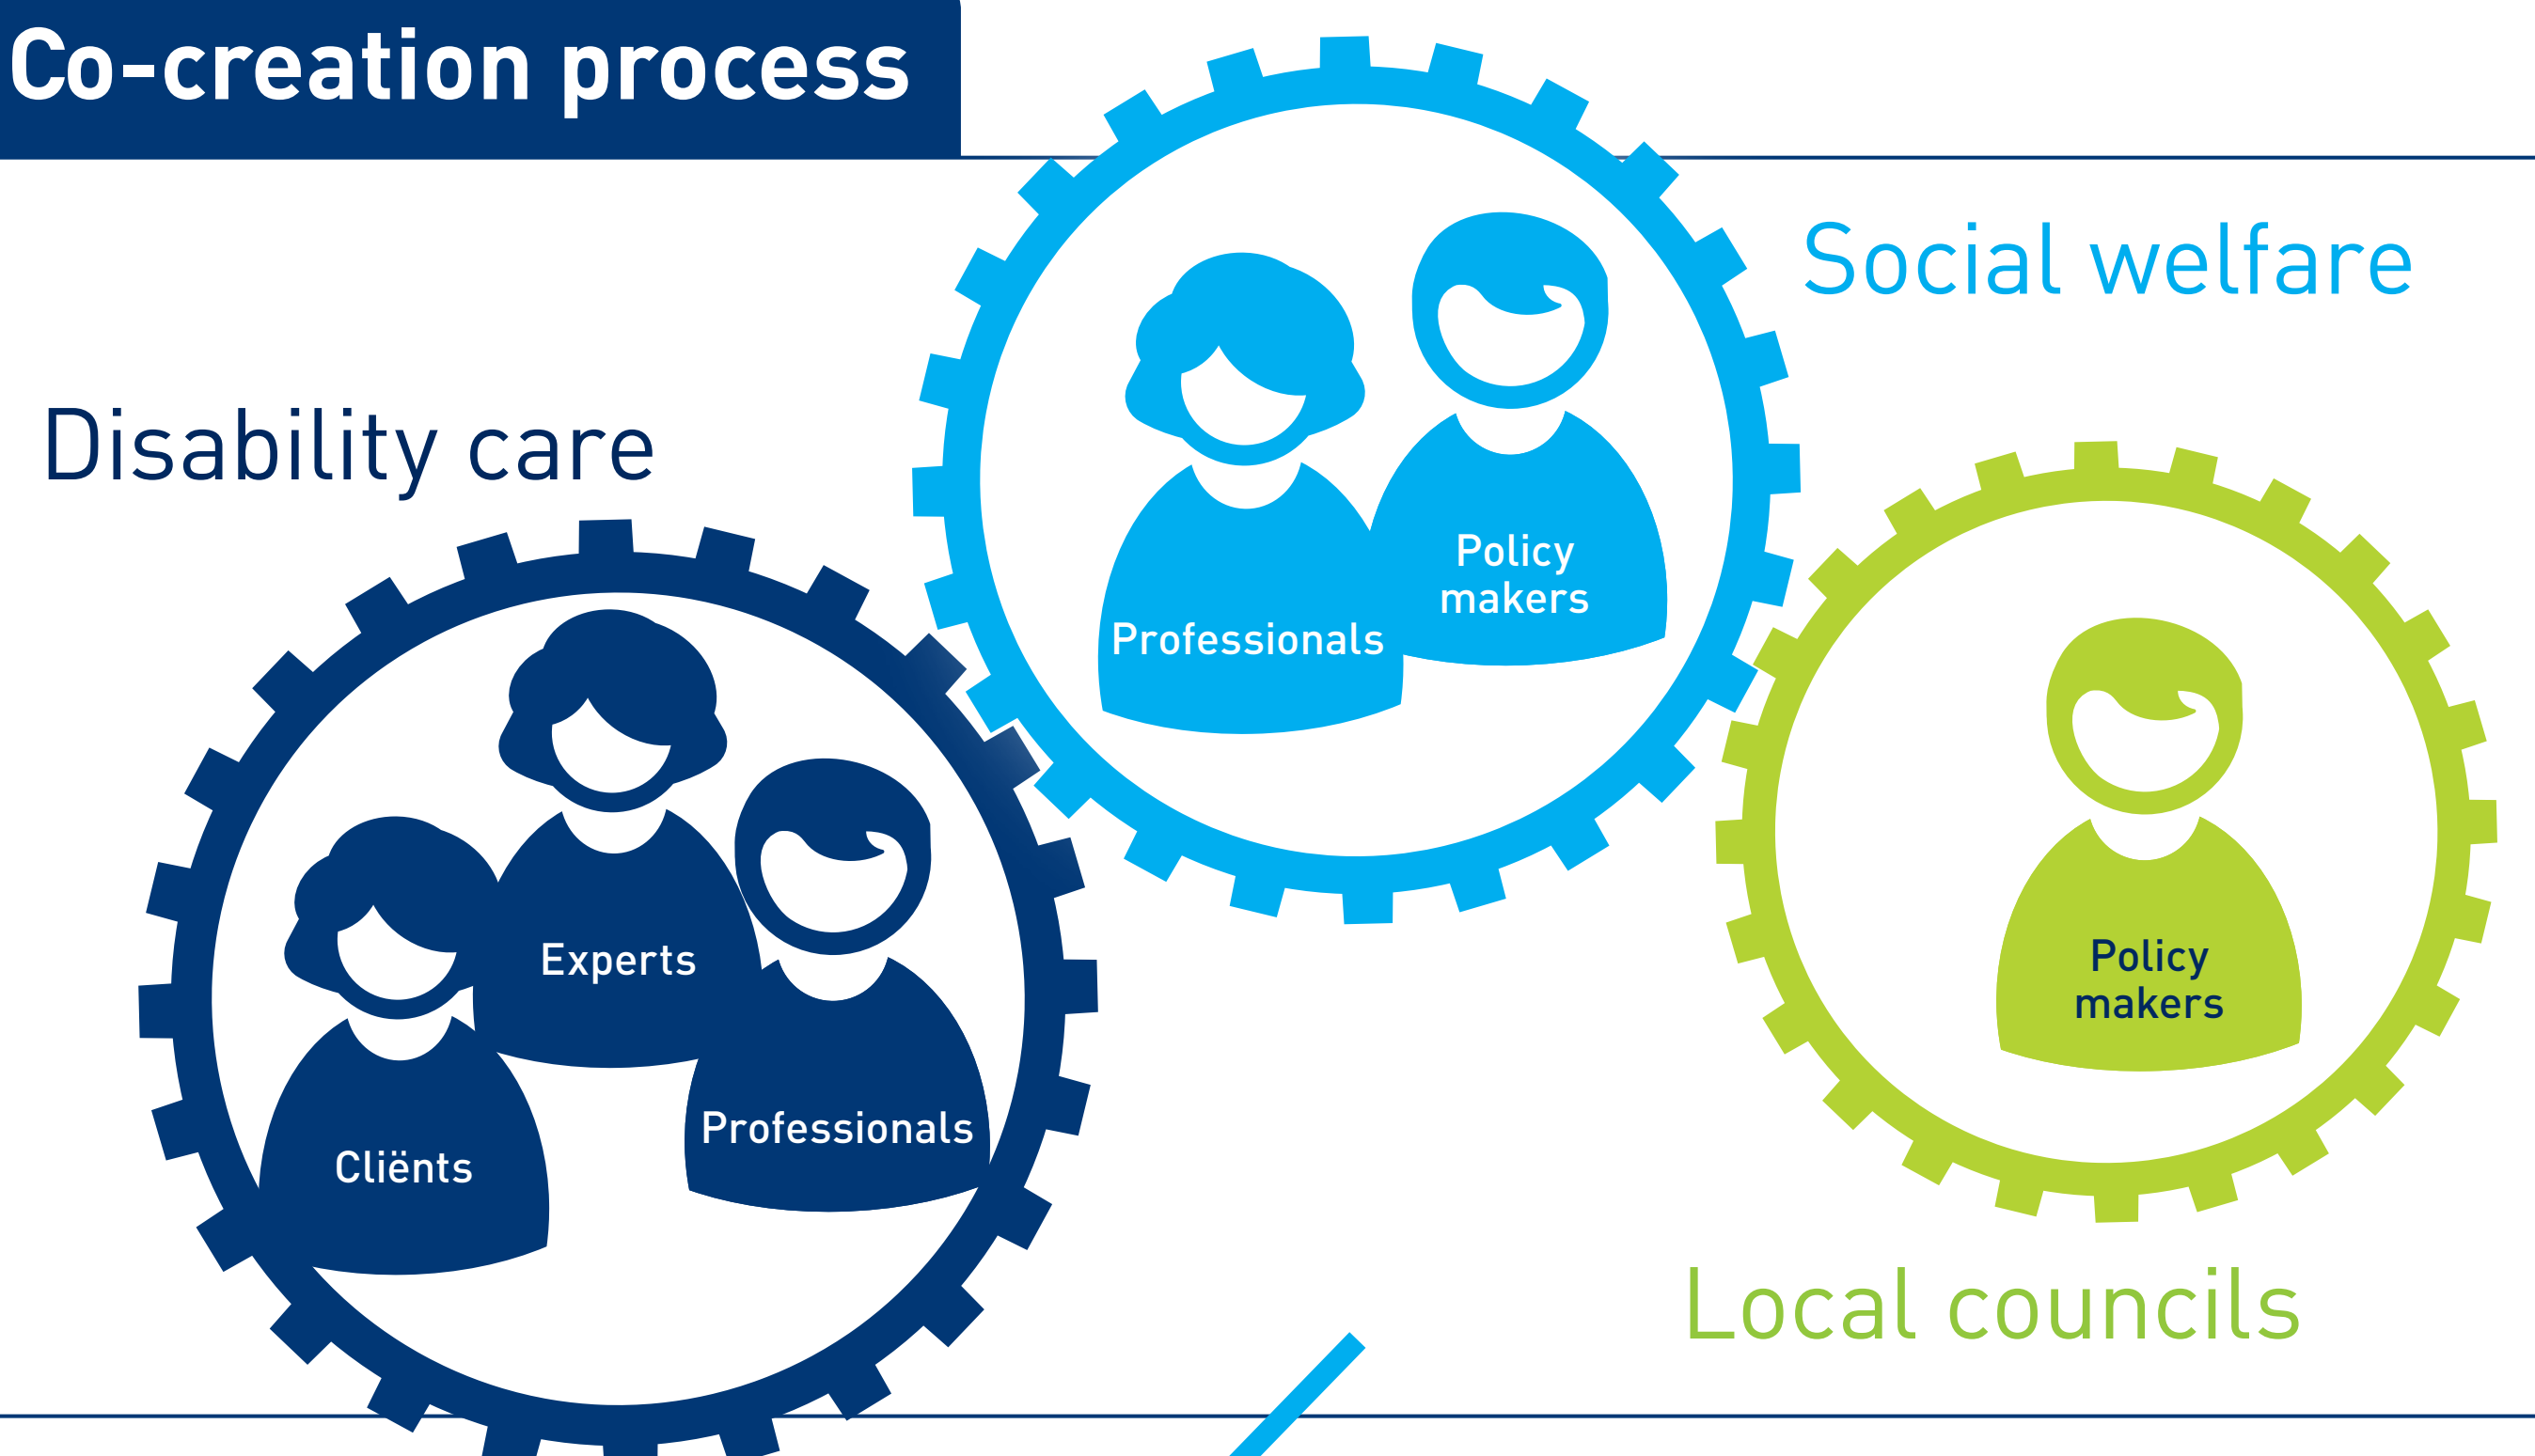

a co-creation process with experts, policymakers, professionals and clients an online Toolkit Older People (www.vgn.nl/toolkitouderen) has been assembled. The toolkit is online since the summer of 2013 and it is visited regularly. It is a useful source of information both for professionals and policy makers in disability care and for partners outside disability care.
